Biography - Karen Fulcher Scholz

Karen is a Director of Engineering at Pitney Bowes Business Insight (PBBI). In that capacity, she is responsible for the teams that build PBBI's software offerings in the Strategy and Analytics and the Developer Products areas. She started at PBBI (formerly MapInfo) in the Consulting Services department where she built custom technical solutions and provided developer training for MapInfo customers. She is a charter member of the Tech Valley Toastmasters club at PBBI.

Karen is an example of a 'reverse brain drain' as she moved to Tech Valley from New Jersey to attend Siena College where she earned a BS in Computer Science. She stayed in the area, married a local, and completed a Masters Degree in Computer Science at Rensselaer Polytechnic Institute.

Karen lives in Clifton Park with her husband Bernie. Together they enjoy travelling and outdoor recreation such as canoeing, biking, and skiing.
